PROFESSIONAL OVERVIEW

Hands-on architect with over 11+ years of experience developing scalable, cloud-native platforms across startups and enterprises. Specializes in JavaScript/TypeScript, .Net, distributed systems, serverless architecture, and real-time data pipelines. Proven leadership in architecting platforms, driving cross-functional teams and managing DevOps lifecycle.

CORE COMPETENCIES

Architecture: Microservices, Serverless, CQRS, SaaS Platforms, Edge-first Design

Cloud Platforms: AWS (Lambda, EC2, S3, RDS, CloudFront, SNS, SES), Azure (Functions, Blob, Cosmos DB), Cloudflare (R2, KV, Durable Objects)

Languages: JavaScript, TypeScript, C#, Python, Java, Go, SQL

Frontend: React, Remix, Angular, Lit, Astro

Backend: Node.js, .NET Core, Express, HonoJS, NextJS, Fast API

Realtime: Kafka, Redis, Supabase, RabbitMQ, Ably

Data: Microsoft SQL Server, PostgreSQL, MySQL, Click House, Cosmos DB, DynamoDB

DevOps & Observability: CI/CD Pipelines, Docker, Terraform, GitHub Actions, Azure DevOps, Datadog (RUM, Tracing), CloudWatch, App Insights

PROFESSIONAL EXPERIENCE

AdoptSequence & AdoptIQ (Curtis Digital Inc.) — Remote

Solution Architect | Oct 2023 – May 2025

- Led backend migration of AdoptSequence from AWS Lambda → Trigger.dev to support long-running video processing.
- Built a public content-sharing system with Astro + Cloudflare Durable Objects; optimized for SEO and low global latency.
- Architected end-to-end audio/video enhancement workflows using FFmpeg, Whisper, and AI voice synthesis.
- Integrated Supabase for real-time sync and Postgres storage; replaced Ably, lowering latency and cost.
- Operationalized RUM + APM in Datadog with CloudWatch signals; guided devs to review error patterns, improving iteration speed by ~50%.
- Implemented PostHog-based interaction analytics with Kafka ingestion, ClickHouse OLAP, and Redis caching; authored the event schema + ETL, reducing time-to-activation and improving onboarding efficiency.
- Developed a modular onboarding SDK (Shadow DOM → Lit Web Components) and a lightweight Chrome extension to test/debug onboarding flows.
- Owned the full DevOps lifecycle: CI/CD pipelines, infrastructure automation, deployment strategy, monitoring, and cloud cost optimization across AWS and Cloudflare.
- Managed multi-repo codebases on GitHub with standardized PR reviews and automation.
- Mentored junior developers, enforced best practices, and led roadmap execution with founders.
- Integrated Clerk authentication across multiple applications.
- Mentored junior developers, enforced best practices, and drove roadmap execution with founders.

Tech Stack: TypeScript/Javascript, Node.js, React, Remix/React Router, Lit, FFmpeg, Supabase (Postgres/Realtime), Trigger.dev, Clerk, OpenAI Whisper, AWS (Lambda, EC2, S3, RDS, CloudFront), Cloudflare (Workers, Durable Objects, R2), Astro, PostHog, Kafka, Redis, ClickHouse, Datadog, CloudWatch, GitHub Actions, Next.js, Python, Django, Docker.

Colliers International (via TopCoder) — Remote

Senior Full-stack Developer | Oct 2021 – Sep 2023

- Replaced a 3rd-party valuation tool with an internal AWS solution (EC2, S3, SES, RDS) in 3 weeks; cut vendor cost ~60–80%, reduced additional developer cost all by myself in 3 weeks.
- Architected microservices on Azure Functions backed by Cosmos DB + SQL Server; reduced API P95 ~30–50%.
- Modernized Angular apps (major version upgrades + module refactors); build time reduced to 25–40%, increased unit test coverage 90%.
- Implemented IaC + CI/CD with Terraform & Azure DevOps.
- Migrated Google Maps → Mapbox, added support for static map on exported documents.
- Mentored engineers & led POCs with architects/BAs; reduced new-hire ramp ~30–50% and accelerated concept-to-pilot ~2x.
- Drove code reviews and onboarding standards; PR cycle time ~20–35%, post-release defects ~20–40%.

Tech Stack: Angular, .NET Core, Azure Functions, Cosmos DB, Blob Storage, Service Bus, GraphQL, Power BI, Mapbox, Syncfusion, AWS, Azure DevOps, Terraform, NestJS, MySQL, AWS (RDS, EC2, S3, SES)

Relisource Inc., Dhaka, Bangladesh

Senior Software Engineer | Nov 2018 – Aug 2021

- Developed **Clinical Trial Management System** for a global pharmaceutical client.
- Built an enterprise **LMS platform** with mobile support for educational clients.
- Actively mentored team members on architecture and clean code practices.

Tech Stack: TypeScript, ASP.NET Core, Xamarin, Microsoft SQL Server, Azure Functions, Azure Service Bus, Angular, AngularJS

Astha IT, Dhaka, Bangladesh

Senior Software Engineer | Mar 2014 – Oct 2018

- Led development for enterprise systems in **logistics, education, and fintech**.
- Mentored junior engineers and participated in system architecture, client demos, and delivery cycles.

Onnorokom Software Ltd, Dhaka, Bangladesh

Junior Software Engineer | Mar 2013 – Feb 2014

PROJECTS

FinSync Personal Finance Intelligence: Elastic Serverless data streams + Vertex AI; hybrid search (keyword + vector), monthly transforms, and RAG chat. Pydantic-validated JSON ingestion.
